

# Previous Light Therapy Equipment Results

The client's finger was black as death.

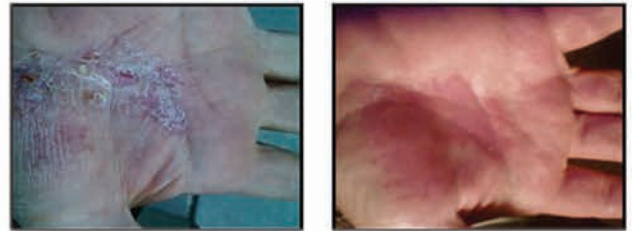

The second picture was taken 4 days later, after using light therapy for 30 minutes daily.

This diabetic patient had fallen on his face from a ladder causing severe trauma to his nose. He used 2 light pads, during 2 30 minute light sessions each day for 4 days. The second picture was taken 8 days later.

The hole in this young man's ankle was three quarters of an inch in diameter and to the bone. The second picture was taken 1 week later, after using light therapy 3 times per day.

A 54-year old house painter was suffering from chemical and environmental exposure. He used light therapy twice per day for 20 minutes each session. The second picture was taken after just 3 days.

This patient had suffered a stroke and was wheelchair bound. Her feet were purple, deep cyanotic purple! The toes were definitely at risk. Her feet were treated one at a time. You can see the difference one session made.
