

# ARE YOU READY FOR DRUG FREE PAIN MANAGEMENT? TRY LED & INFRARED PULSED LIGHT

U2 Universal  
Pain Buster

Light therapy can be helpful in reducing chronic pain, inflammation & loss of sensation often associated with diabetic related peripheral neuropathy. As a direct result, people experience an improvement in balance which can mean less frequent falls. Other chronic pain frequently associated with fibromyalgia and other arthritic conditions, can be reduced or eliminated. Studies have shown that Infrared and Visible Red light increase mitochondrial ATP production and have a profound effect on the level of Nitric Oxide and it's role in managing pain.

## LED Infrared light is effective for these and many other concerns:

- Chronic & Acute Pain
- Inflammation
- Bruising
- Muscle problems
- Edemas
- Headaches
- Depression
- Skin conditions

**GREAT FOR THE WHOLE FAMILY**  
Helps relieve the stresses of the day.  
Works for Dad's pain and Mom's skin.  
It also empowers the children to heal  
their scrapes, bumps and minor aches.

### QUALITIES OF BLUE AND RED LED

#### BLUE

Calming  
Cooling  
Oxygenating  
Detoxifying

#### RED

Stimulating  
Warming  
Hydrogenating  
Energy  
Healing

FDA cleared for pain management and inflammation.

## HEALTHLIGHT™ Q & A

### Is it Safe?

Yes. These are professional grade tools that are used by healthcare professionals and are also safe for home use.

### What will I experience?

The pad is placed directly against the skin where treatment is desired. You will feel a relaxing warm sensation.

### How does infrared therapy reduce pain and increase circulation?

Infrared phototherapy releases nitric oxide from the hemoglobin and surrounding tissue. Nitric oxide relaxes muscle cells found in the arteries, veins, capillaries and lymph vessels. When these muscles relax, they dilate the blood vessel, thus allowing increased circulation.

### What is the difference between HealthLight™ and other infrared devices?

HealthLight™ uses a new combination of non-visible (infrared) and visible (red or blue) light waves. The visible light feature is very beneficial for problems close to the skin such as wounds, cuts and scars. It is also particularly effective with infections. Infrared light is more effective for bones, joints, deep muscles etc. The HealthLight™ System is pulsed to the resonance frequencies of Dr. Nogier. Studies have shown these frequencies to be more important than wavelength (color) in the healing response for most conditions.

*Ask your doctor about the benefits  
of pulsed light therapy*

# GOT PAIN?

EXPLORE  
THE  
BENEFITS  
OF LIGHT

## U2 UNIVERSAL *pain buster*

The ultimate in versatility.

Use on hands, wrists, neck, knees, elbows, lower back, feet, etc.

Comes in Red and infrared or Blue and Infrared. Has 81 diodes, 7 manual settings, 5 automatic settings and auto shutoff for safety. This is the most powerful device of its size.

### FISTULA HEALED & PAIN CONTROLLED

"My daughter has struggled with an open fistula and extreme pain for five years. During that time we visited various doctors, endured multiple treatments and underwent surgeries; all to no avail. Then we found the Pain Buster HealthLight™. With light therapy my daughter is able to control her pain and we have seen the fistula heal to within an opening of a pinprick! This is evidence that the healing is occurring at the cellular level, not just isolated to the surface. HealthLight™ gave a medically weary family hope at a difficult time when all confidence had been lost that a physical healing could ever occur."

- Figaro's family

## PODIATRIC *boot/pad*

This unique unit comes with a pad that folds into a boot to cover the entire foot and ankle as well as one optional U1 Universal 50 diode pad for use on the leg and foot simultaneously. The unit was designed with neuropathy in mind. The boot can be opened flat to be used around the head or neck and along the spinal column.

Boot Pad Variant

### DIABETIC NEUROPATHY THERAPY RESTORES SENSATION!

"I started having problems with my feet and legs two years ago. I could barely walk most days. The neurologist put me on a medication called Neurontin. I started taking 100 mg and was increased to 3,200 mg per day to control the pain. My life was miserable from taking this medication. My life changed when a friend referred me to a Physical Therapist who does light therapy.

I started going for light treatments three days a week.

I was amazed at the difference so I purchased the lights for home treatment and am now off of the medication. My quality of life has improved and is worth living now. Thank God!"

- Joyce H.

## U2 UNIVERSAL *plus*

Optional Dual Pad configuration

More than 8 times the coverage of the U2 Universal! Designed to cover the length of the back or 100% of the knee or both feet simultaneously. Comes in Red and infrared or Blue and Infrared. Has 264 diodes, 7 manual settings, 1 automatic setting and auto shutoff for safety.

### BACK ON MY FEET

"I am 84 years old and suffer with arthritis in my back and hips. I have always been very active up until last year. The pain had gotten so bad that I could no longer walk straight and had to shuffle around with a cane. My nephew brought me a big pad that had red lights and told me to put it right against my skin down my back.

After 20 minutes, I went to stand up and to my surprise I was standing straight up! Not only that, I now can take steps as opposed to shuffling across the floor. I wouldn't say that I am a spring chicken again but my light has brought me back to life!

I wouldn't want to be without my HealthLight™."

- James F.
